MODEL HOME PROGRAM FOR NEW RESIDENCES

City of Houston
Houston Public Works
BUILDING CODE ENFORCEMENT

Plan Review - New Residences
1002 Washington Avenue, Floor 3
Houston, TX 77002
(832) 394-8820
Office Hours 8:00 a.m. - 4:30 p.m.
Latoya.Moten@houstontx.gov

GENERAL INFORMATION

The MODEL HOME PROGRAM is designed to save both time and money to builders and developers who build (10) or more units of the same model home over the span of a year.

The advantage of this program is that fewer plans need to be submitted for Plan Review. For subsequent identical units built, plan reviews are performed in an expedited manner and permit fees are known in advance.

Model A

Model B

HOW DOES THE MODEL HOME PROGRAM WORK?

Before proceeding with any work, make sure your project complies with your subdivision's deed restrictions. Contact the civic club or homeowner's association for a certified copy of the deed restrictions.

Additionally, visit the Development Review Section at 1002 Washington Avenue for a site development review. Following this procedure could possibly save you considerable time and money.

To register for the Model Home Program, visit our office located at 1002 Washington Avenue, 3rd floor.

I. Submitting the MODEL HOME Plans

Submit a complete set of plans for the model home electronically. For instructions, refer to the Residential EPR Guide at: <https://www.houstonpermittingcenter.org/media/2291/download>

Plans must show prescriptive compliance with the 2015 International Energy Conservation Code. If a software program is used to verify energy code compliance, provide a copy of the report. Plans must be to scale and neat.

The plans do not need to be professionally drafted, with the exception that an engineer's seal is required for the following:

- ♦ foundations
- ♦ metal structures
- ♦ engineered lumber or beams.
- ♦ prefab trusses
- ♦ CMU structures

Once you complete an online application for the MODEL HOME, iPermits will issue a project number, the appropriate information will be recorded in our system for REPEAT HOME reference. The approved MODEL HOME plan is required to be on the jobsite for inspections.

NOTE: If the plan is not approved, it will be returned with a list of corrections. Redlines are not accepted, therefore, corrections shall be incorporated into the design before resubmittal

II. Submitting the REPEAT HOME Permit Application and Plans

Application for the Individual Repeat Home Permits must also be done electronically. An Unsworn Declaration must be uploaded through iPermits. The appropriate Model Home Project Number will need to be selected from auto populated list available under your logon.

The plan submittal package should include a Grading and Fill Worksheet (Form CE-1094), site plan and a Landscape Analysis Forms.

Taps & Meters (Wastewater)

It is advised that you visit the Taps & Meters (Wastewater) Section to ensure there is available water and wastewater for your project and to set up accounts.

Planning & Development Services

- ☐ Certified survey
- ☐ Site plan
- ☐ Copy of recorded subdivision plat if not previously provided.

For minimum development site plan requirements visit the Development Services (Planning) Section.

Floodplain Management

(Properties located in the Floodplain)

- ☐ A set of plans with elevation certificates signed and sealed by a Texas registered professional surveyor or engineer.
- ☐ Requirements for development within the Floodplain are available in the Floodplain Management Section.

Traffic

- ☐ A site plan is required for review and approval. Show the existing street improvements such as trees, poles, sidewalks, driveways, curbs and gutters, ditches, culvert sizes and lengths and inlets. Show proposed driveways and improvements with all dimensions.

III. Expanding the MODEL HOME program to Additional Subdivisions.

Permits issued under the MODEL HOME program are site specific. When a builder wants to expand construction to a new area or subdivision that was not part of the approved Model Plan, the following steps must be completed:

1. Provide the approved set of the Model Home plans and project number to the Residential Plan Review Supervisor, and an attached letter from the Engineer of record stating that this house/foundation is also approved for the new subdivision.

The content of the letter must include the approved Model Home project number and the new subdivision's name.
2. The Plan Analyst who approved the original set or a Plan Analyst designated by the supervisor, will stamp another set for the builder, if desired, as long as it is the same as the red stamped plan presented by the builder. He/she will attach the engineered letter to the drawing and film a copy of the letter under the same master project number.
