

SCOPE - The form is used to calculate an *actual* occupant load in educational spaces governed by the Texas Educational Agency (TEA) rules that limit maximum class size to approximately 2/3rds of that specified by the IBC occupant load factor identified in Table 1004.1.2 for educational spaces. The code review and minimum code requirements will be based on the IBC calculated *design occupant load*. Once the code review is approved, the *actual occupant load* value will be used to correlate the Wastewater Capacity Reservation letter with the Certificate of Occupancy. This will eliminate unnecessary Wastewater Capacity fees for the school.

PART II. DEFINITIONS AND INSTRUCTIONS

Definitions: Use the following definitions to help with the terms in Part I of the form.

TEA - The Texas Education Agency.

DESIGN OCCUPANT LOAD -The number of persons (less loads of non-simultaneous use spaces) for which the means of egress, mechanical ventilation and plumbing fixtures of a building or a portion thereof must be designed using the occupant load factors in Table 1004.1.2 of the Houston Amendments to the 2015 International Building Code.

ACTUAL OCCUPANT LOAD - The number of students allowed by TEA in an educational space plus the maximum number of staff assigned to those students. This number also should not include the loads associated with non-simultaneous use spaces.

Instructions: The following numbers correlate with the boxes in Part I of this form. Use the instructions to complete the requested information in each box of Part I. Submit completed forms by email to: HPC-RA@houstontx.gov. **NOTE:** Incomplete forms cannot be processed.
