

Resetting Internet Explorer Options

If other solutions have not resolved issues displaying ProjectDox while using Internet Explorer, you will need to reset your Internet Explorer browser options. **Note: these instructions will delete all personal settings, not just those related to ProjectDox.**

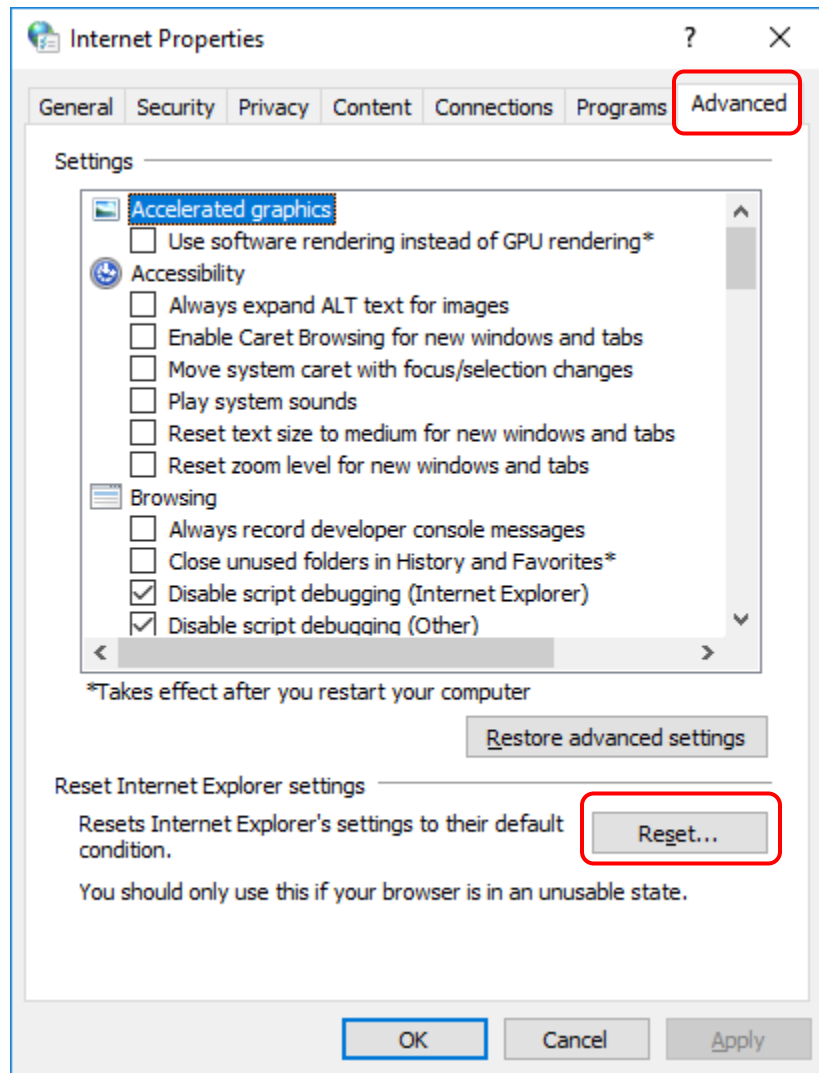

1. Close all applications. Type **Control Panel** into the search field next to the Windows button and click on the match to open.

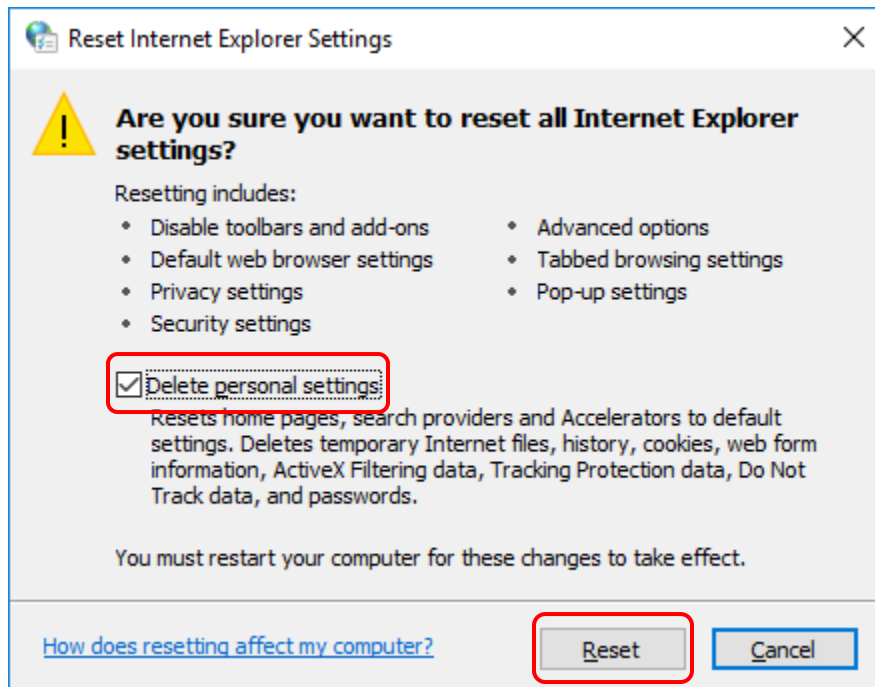

2. From the Control Panel window, click on the **Internet Options** link.

3. From the Internet Properties window, go to the **Advanced** tab and select the **Reset** button.

4. From the pop-up window, check the box for **Delete Personal Settings** and then select the **Reset** button. For more information about this action, click on the link “*How does resetting affect my computer?*”

5. Once finished, click the **Close** button and restart your computer.
