

Master Unit Price Item List

Development

This Master Unit Price Item List (MUPIL) was developed using a combination of the following items

- 1) Five years of historical bidding information meticulously researched
- 2) Alignment with "Measurement and Payment" of each construction specification

<u>Principles</u>

The MUPIL was created based on the following principles

- 1) A three digit identifier has been given to each unique unit item description
- 2) The intent is this identifier remains with that description forever. This will allow for easy pricing research and cost evaluation moving forward and ensure alignment with the specification
- 3) The three digit identifiers have been spaced in such a way to allow for additions, if warranted, without affecting the existing numbering

How to Use

- 1) Unit price items and unit of measure shall align with the measurement and payment of the associated specification
- 2) Only unit price numbers listed shall be listed on Document 00410
- 3) The need for a new unit price description may indicate improper use of a specification, the need for a one time use specification, or the need to create a new specification
- 4) To request a new unit price item, please contact <a href="https://doi.org/10.1007/j.jep.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.10.1007/j.jep.1007/j.je
